

Next page

Here we go — **Page 24 of 24: Downloadable Assets & Resources.** This is the final page of the full 24-page TiltCheck site build, and it ties everything together with clean access to files, diagrams, branding, docs, and developer resources.

## ★ Page 24: Downloadable Assets & Resources

### Downloadable Assets & Resources

**Everything you need to build, brand, integrate, and deploy TiltCheck — all in one place.**

This page is the home for all downloadable files, graphics, configs, and dev materials. It's built for three types of people:

- **Devs** who want to integrate or extend TiltCheck
- **Server owners** who want quick setup or bot imports
- **Brand/content creators** who need visual assets or documentation

Everything here is freely available, no gatekeeping.

### Branding & Graphics

TiltCheck's branding bundle includes:

#### **PNG Logo Pack**

- Full logo (light)
- Full logo (dark)
- Icon only
- Horizontal lockup
- Circle profile icon
- Banner/header variants

#### **Mascot & Theme Art**

- Degen-coded minimalist mascot
- Wallet lock icon
- Tilt meter icon
- "Made for Degens by Degens" footer badge
- Transparency shield
- Legal alert badge
- Trust Engine visual

#### **Mockups**

- Discord bot message previews
- Dashboard UI mockups
- Arena poker table UI (future concept)

If you'd like, I can generate **rich PNG versions** of all of these next.

### Documentation Files

Full doc set from your monorepo, including:

- **0-intro.md**
- **1-brand.md**
- **2-founder-voice.md**
- **3-ecosystem-overview.md**
- **4-tools-overview.md**
- **5–7 tool specs**
- **8-trust-engines.md**
- **9-architecture.md**
- **10-data-models.md**
- **11-system-prompts.md**
- **12-apis.md**
- **13-discord-bots.md**
- **14-poker-module.md**
- **15-future-roadmap.md**
- **16-diagrams.md**

These files match the 24-page site content structure.

### Developer Tools

#### **1 Copilot Agent Config Template**

For instantly setting up your TiltCheck agent inside GitHub:

```
yaml
name: TiltCheck Agent
description: >
  Custom agent trained on the full T:
  extending, validating, and improv
prompts:
  - role: system
    content: |
      You are the TiltCheck Agent...
  # (full block provided earlier)
```

#### **2 Event Simulation Scripts**

For local dev:

- event-publish.sh
- event-replay.sh

#### **3 Module Skeletons**

Ready-to-extend templates for:

- JustTheTip
- SusLink
- FreeSpinScan
- Tilt Engine
- Accountability Wallet
- QualifyFirst
- DA&D
- CollectClock

#### **4 Webhook Templates**

Ready cURL + JSON examples.

### Code Resources

#### **Available in the repo:**

- /modules/\* → each core module
- /events/\* → sample events
- /storage/\*.json → trust + history data
- /docs/tiltcheck/\* → documentation set
- /scripts/\* → scaffolding + legal stamp tool

#### **External Resource**

You also have an uploaded helper PDF at:

 **Automating X Posts for Engagement**  
Local file path:  
/mnt/data/Automating X posts for engagement.pdf

I can extract content or generate optimized versions on request.

## Community & Support

### **Discord Templates**

- Channel layouts
- Role suggestions
- Safety settings
- Bot-permission templates

### **Mod Tools**

- Report forms
- Flag review templates
- Abuse detection guide

### **User Tools**

- Quick start
- Wallet linking instructions
- Trust score glossary
- DA&D guide

### Download Modes

TiltCheck will make assets available in three formats:

#### **Direct PNG/SVG Downloads**

For branding, diagrams, logos.

#### **ZIP Bundles**

- branding.zip
- diagrams.zip
- docs.zip
- module-templates.zip

#### **GitHub Repo Access**

Full monorepo structure for devs.

## Final Page Message

TiltCheck isn't just a set of bots — it's a complete ecosystem for fairness, fun, transparency, community, and emotional safety.

These resources give builders and server owners everything they need to bring that ecosystem to life.

If you want, I can now:

- generate **all PNG assets**
  - build a **compressed ZIP of the branding kit**
  - create **website-ready graphics** for every page
  - extract summaries from your uploaded PDF
  - generate a **demo landing page layout**
  - output **HTML templates** for the full site
  - or help you **deploy the site** with Vercel/Cloudflare Pages
- Just tell me:
- "Give me the PNGs"**
- or
- "Generate the ZIP bundle"**
- or
- "Help me build the site"**
